EDUCATION

Bachelor of Graphic Design

Universidade FUMEC, Brazil

2007 – 2011

Senior design leader with 14 years across visual and product design, 6 of them focused on enterprise UX. Leads a 7-person team at MetLife Japan, partnering with Claims, Call Center, Customer Care, and IT. Recent work includes a registration redesign (+30% completion, 40% faster) and a sales platform redesign that accelerated digital sales by 40% — while actively building hands-on fluency in AI-assisted design and design-to-code workflows.

EXPERIENCE

Manager, UX Design

Jul 2023 — Present

MetLife Japan

- Lead a 7-person design team (2 FTE + 5 vendors) supporting customer portals, agent sales platforms, and internal tools across multiple business lines.
- Redesigned the customer registration flow — **+30% completion rate** and **40% faster time-to-complete** (2026).
- Led the agent sales platform redesign — **40% faster digital sales process**, plus **+11% completion on key procedures** (2025); contributed to MetLife Japan hitting its annual NPS targets.
- Partner directly with Claims, Call Center, Customer Care, and IT — adapting methods like journey mapping and Value Proposition Canvas into short, in-the-flow sessions that fit BAU delivery rather than slowing it down.
- Driving an internal design-to-code initiative (Figma MCP, Copilot, Claude Code) to reduce design-to-production lag; built an onboarding program and a Power Automate intake workflow that standardised team operations.

Assistant Manager, UX Design

May 2021 — Jul 2023

MetLife Japan

- Embedded design-thinking into Agile delivery, partnering with business and engineering on journey mapping, prototyping, and behavioural data analysis.
- Shipped end-to-end UX on flows including customer registration (balancing OTP security against onboarding friction), claims billing preferences, and notification settings.

UI/UX Consultant

Jan 2020 — May 2021

MetLife Japan

- Led UX for an agent-facing sales application — wireframes, prototypes, and high-fidelity layouts for new feature streams within a Scrum delivery cadence.

Earlier — UI/UX Designer at Trifort Inc. (Nov 2016 — Jan 2020, Tokyo). Service design across web and mobile for a multi-client portfolio: stakeholder engagement, concept presentation, and end-to-end design delivery.
